

# F3 FLUSH FIT DOOR SYSTEM

The new Mobile F3 flush door system replaces the F1 and F2 Mobile systems which were removed from JR Mobile's production lines in 2005.

Due to repeated requests the Mobile flush fit door system is available once again.

The new F3 system now debugged and redesigned makes this door system a serious contender when choosing a flush fit door for today's requirements for both modern fleet user or owner drivers.

Making JR Mobile the one stop shop for all aperture control systems.
